SUMMARY

AI/ML Engineer with 5+ years building production machine learning systems across supply chain and manufacturing domains. Specializing in LLM/LMM orchestration, multi-agent systems, and end-to-end agentic workflows using LangGraph, LangChain, and MCP. Pursuing MS in Computer Science (AI Specialization) at Georgia Institute of Technology.

EDUCATION

Georgia Institute of Technology

Atlanta, GA

Master of Science, Computer Science – Artificial Intelligence Specialization

Jan. 2024 – Dec. 2026

- **Coursework:** Machine Learning, NLP, ML for Trading, Robotics AI Techniques

University of California, Riverside

Riverside, CA

Bachelor of Science, Computer Engineering

Dec. 2019

EXPERIENCE

AI/ML Engineer, Supply Chain

Mar. 2026 – Present

QuidelOrtho

San Diego, CA

- Architecting a multi-agent supervisor system using LangGraph to coordinate specialized LLM agents across global supply chain domains, shifting from single-pilot RAG to a scalable, decentralized agentic ecosystem.
- Developing MCP servers integrated with Databricks Genie spaces, enabling Claude and other LLMs to securely access and reason over heterogeneous datasets via modular tool-calling.
- Leading the transition to a multi-Genie space architecture; designed the orchestration layer that routes complex queries to domain-specific MCP servers with 95%+ routing accuracy.
- Established CI/CD and MLflow standards for automated model evaluation while mentoring an AI/ML intern on production-grade software engineering and agentic design patterns.

Data Scientist & Systems Engineer

Apr. 2023 – Aug. 2025

Caltrol

Irvine, CA

- Built time-series anomaly detection models in Python across 25+ industrial manufacturing assets, reducing unplanned downtime by 20%.
- Integrated AWS IoT and MQTT pipelines for real-time predictive maintenance, transitioning assets from calendar-based to condition-based servicing.
- Developed automated data pipelines and Power BI dashboards, replacing manual inventory calculations with a 30-minute refresh cycle.

Associate Machine Learning Developer

Jan. 2023 – Apr. 2023

Caltrol

Irvine, CA

- Reframed a computer vision project into a time-series forecasting approach, increasing model interpretability and stakeholder trust.
- Built Random Forest anomaly detection models on multi-sensor data from rotary kilns; reduced false positives by 16%.

Associate Systems Engineer

Oct. 2020 – Jan. 2023

Caltrol

Irvine, CA

- Developed automated data pipelines from ERP systems to Power BI, enabling KPI tracking and operational analysis.
- Designed and implemented the department's first standardized onboarding curriculum, cutting new engineer ramp-up time by 50%.

TECHNICAL SKILLS

Languages: Python, SQL, C++

GenAI & LLM: LangGraph, LangChain, RAG, MCP, Multi-Agent Systems, LLMs/LMMs, Agentic Workflows

Infrastructure: Docker, Kubernetes, AWS, Azure, Databricks, Git, MLflow

ML & Data: PyTorch, scikit-learn, PySpark, Time-Series Analysis, Anomaly Detection, NLP, Transformer Architectures, Matplotlib, Seaborn

Tools: Claude Code, Power BI, Tableau

Interests: Quantum Computing, Tennis
